Collator Series Streamfeeder Systems Elite Series featuring FeedNet

Overview

When feature-rich, intelligence is required to process and package your products at high speed, our Elite Series collator systems featuring FeedNet Advanced Collator Communications are ideal for supporting the sophisticated requirements. Modular design allows these systems to be used with a variety of automatic wrapping systems or can also be used stand-alone. Standard systems are available in four station offerings up to twelve stations. Additional configurations are available upon request. Collator base lengths range from 11' up to 18' depending on number of stations.

Feed a wide variety of flat and multi-thickness products into automatic wrappers, baggers or in stand-alone mode. Operates continuously in excess of 200 packages per minute.

Standard Features

Modular design • ST-1450 or 1250 Packaging Series Streamfeeders
 • FeedNet Advanced Collator Communication • Heavy-Duty Modular Collator Base • Tool-less setups and changeovers • 32-color Touchscreen • Sequential Start/Stop • Configurable feeder location • Built in system diagnostics • I/O interface to host systems for increased system efficiency • Line synchronization • Designed for easy-add options such as cover-opening systems, spearing systems, bar code reading/verifying, selective feeding, recipe storage, and more.
